Assignment 2: Travel Adventures (10%)

Due Date
See course webpage

Testing Environment
Your website will be tested by opening your **index.html** file in Chrome. *Live Server* will NOT be used to run your website.

Before you submit, double click on your index.html file and ensure that it looks correct in Chrome Browser. Check that all images are working and there are no broken links)

Submission Instructions
Carefully review the following submission checklist:
- ☐ Submit a zip file containing your code to the course dropbox. **No 7z or rar files accepted.**
- ☐ Name your file `a2-studentname-studentid.zip`. Replace studentname and studentid with your name and id
- ☐ Ensure that your zip file contains all the required html, css, and image files needed to display your webpage.

Assignment Guidelines
- This is an individual assignment.
- Please review Seneca's policies on Academic Integrity, specifically:

  "Each student should be aware of the College's policy regarding Cheating and Plagiarism. Seneca's Academic Policy will be strictly enforced.To support academic honesty at Seneca College, all work submitted by students may be reviewed for authenticity and originality, utilizing software tools and third party services. Please visit the Academic Honesty site on http://library.senecacollege.ca for further information regarding cheating and plagiarism policies and procedures.

  Ensure that your code or any part of it is not duplicated by another student(s). This will result in a percentage of zero (0%) assigned to all parties involved.

Technical Requirements
- Your code must be written in HTML5 and CSS.
- No CSS frameworks or Javascript libraries permitted

Assignment Description

You have been hired as a front-end developer by "The Adventure Travel Company". The company wants you to build a website that enables tourists to explore adventure experiences on their next vacation. Similar websites include:

- AirBnB Experiences: https://www.airbnb.ca/s/experiences
- Viator: https://www.viator.com/
- Lonely Planet Experiences: https://www.lonelyplanet.com/experiences

The website consists of 4 sections. **You must write the code to implement each section.**

1/ Header

The header **MUST** contain a horizontal navigation menu for your website.   You may customize the fonts, colors, and sizing of the header.

The navigation menu must consist of the following links:
1. Home: Clicking on this link will take the user to the index.html page
2. Featured Experience:
   - Choose any experience from AirBnB, Viator, or Lonely Planet Experiences
   - When the user clicks on Featured Experience, open a new browser tab pointing to the experience you selected.

2/ Hero Section

This section must display a full height (100vh) background image and centered text. The hero section should advertise the *purpose* of the website.
